

## RG-3300V | HEAVY DUTY ROLLSLITTER

**Built as a tank! To slit your heavy banner/textile rolls up to 320cm width**

> **Optional** Rewinding solutions build on the slitter possible

### Specifications

Length	414cm
Width	109cm
Height	150cm
Weight	+/- 500kg
Motor Power	1.5 KW
Voltage	230V, 50hz, 8A 1 phase
Construction	Heavy steel welded frame

### Keypoints

- > Precise and exact slit, computerise sharpened blades
- > Rolls are tightened both from inside and outside for the best control during slitting, advisable when slitting Windowfilm/Reflective and Magnetic Tapes
- > Digital measuring system to be able to measure on the mm/inch
- > For rolls up to 320cm width
- > Strong free hanging axle, for rolls up to 180kg
- > Hydraulic support for loading heavy rolls
- > Maximum diameter of the roll is 25cm including 3" core, optional 30cm
- > Robust construction for continuous use, no movement of the frame during slitting of heavy materials
- > Minimum slitting width is 5mm

### Materials to slit

- |               |             |                    |                      |
|---------------|-------------|--------------------|----------------------|
| > PVC Banner  | > Paper     | > Reflective       | > Double Sided Tapes |
| > Textile     | > Foam      | > Self Adhesives   | > Magnetic Tapes     |
| > EPDM Rubber | > Wallpaper | > Windowfilm/Paint | > Interior Foil      |
| Membranes     | > Leather   | Protection Film    | > Wrapfilm           |

## ABOUT US | ROBART INTERNATIONAL

### ROLLSLITTERS, REWINDERS AND SHEETERS

*Pieter Luik sr, the previous owner and founder of the business, laid the foundation for Robart International B.V. as an importer of Self-adhesive Vinyl and Graphic Art Materials till 2002, a legacy that Robert Luik has proudly continued with slitting/rewinding and sheeting equipment.*

Simple, strong, heavy and precise, these words summarize our machine building philosophy, which has catapulted us to the forefront of the global market. We pride ourselves on our ability to deliver robust machinery that lasts for years on end, and our machines can be found in over 90 countries worldwide.

We understand that in a rapidly changing world, reliability and durability are paramount. We have built a reputation as a trustworthy partner, and we are committed to upholding this legacy for generations to come.

Our machines are designed with the user in mind, and our ergonomic construction makes operation a breeze.

We also offer optional automation features that reduce waste and minimize human error. For example, our heavy-duty slitter, the RG-1650-2100V, can be produced with an automation upgrade boasts as semi-automatic slitter, with pre-programmable widths for quicker operation.

All of our machines can be operated as stand-alone equipment, but they can also be upgraded to meet your specific needs.

Contact us today to learn more about our cutting-edge solutions and how we can help take your business to the next level.
